## VACANCY

### JOB VACANCY FOR RESEARCH PHYSICIAN (1)

Date: **January 27, 2012**

The National Institute for Medical Research through its project “Implementation Science to Optimize Malaria Vector Control and Disease Management (ISOMCO) is seeking for a suitable candidate for the following position:

**Position:** Research Physician

**Location:** Mvomero District

**Contract Period:** February-June 2012

#### Qualifications

The desired candidate should hold a Medical Degree (MD) from a recognized University. She/he should have good knowledge of research methodology and ethics and should be ready to work and travel in hard to reach areas in rural villages. She/he should have excellent interpersonal and team skills. The candidate should be willing to be in Mvomero for the duration of the contract.

#### Responsibilities

1. Supervision of community health workers (CHW) in performing malaria diagnosis and treatment
2. Conducting training and managing health research project on malaria interventions
3. Conduct home visits to monitor CHWs, and making sure they are visiting the right homes and only those homes.
4. Daily review of data collected by CHWs and troubleshoot problems identified
5. Weekly compilation of data, analysis and submission of report to the Project Coordinator
6. Other duties as assigned by the Project Coordinator

#### Remuneration

A competitive remuneration and benefit package will be offered to the successful candidate within the PRSS 9-10.

#### Mode of application

Interested candidates are invited to send their cover letter, Curriculum Vitae enclosing certificate copies of relevant education and training to ISOMCO Project Coordinator at [isomco@nimr.or.tz](mailto:isomco@nimr.or.tz) or National Institute for Medical Research, 2448 Ocean Road, Dar es Salam, Tanzania within 7 days.
